Genius-2000

This high-tech machine is well equipped to deal with today's busy working practice. With built-in dust suction, neon lamp, protective shield and polishing machine, this unit saves space and money. Plus, with the option of a micro-motor, you can't go wrong.

Features single-shaft polishing machine with 1500 rpm suction with electronic speed control, built-in neon lamp and protection shield. Weight: 65 kg. Dimensions: 50 cm x 48 cm x 112 cm.

Available with or without 90 watt micro-motor.

Microbox Finishing Cabinet

Special Order

Cabinet for the milling and finishing of precious metals, and for the treatment of hazardous volatile chemical compounds. Manufactured from plexiglass and all joints are proof bonded. A pull-out drawer collects residues being used. The tube supplied with the unit enables the connection of a suction unit. Dimensions: 32 cm x 30 cm x 25 cm. Weight: 3 kg.

EQU66300 Microbox Finishing Cabinet

Labo Station

Special Order

Safety workplace cabinet equipped with multiple side entrances, neon light, fast air connector and power supply intake. Features wooden air-stock-intake, replaceable internal work-top, wide glass window, drain trellis and air syringe. Compatible with the dust extractor unit Airbox (for simultaneous switch-on/off). Dimensions: 60 cm x 40 cm x 40 cm. Weight: 15 kg.

Spectacle Frame Heater

Large frame warming chamber, adjustable electronic temperature control, safety cut-off and heavy duty fan motor. Supplied with a UK mains plug and 2 year warranty.

ACC319 Spectacle Frame Heater

Denstar 410 Electric Wax Heater

Special Order

Features 4 chambers, with analogue dial temperature control. Heats wax quickly and maintains the required temperature, and also features LED on/off/ready indicator. Dimensions: 192 mm x 114 mm x 80 mm (WxDxH).

ACC208C   Denstar 410 Electric Wax Heater

Electric Wax Bath

Special Order

For impression dipping. With thermostat control.

ACC208B   Electric Wax Bath

Gel Melt Unit

Special Order

6 litre stainless steel automatic gel melting/mixing unit. Features time delay start-up, programmable melting point and pouring temperatures. Equipped with a high torque motor that allows the operator to start the blades turning even when the tank is full of pre-chopped gel.

ACC281   Gel Melt Unit

Palamat Practic ELT Water Bath

Special Order

Electronically controlled pressure polymerisation unit for cold cure resins. The high-grade plastic housing is fully water-tight and corrosion-resistant. All functional operations of the machine are controlled from the key pad on the control panel. Automatic programming and electronically controlled heating make sure that polymerization of the acrylic is suited to the material properties. The Palamat Practic ELT also has a program for automatic drainage of waste water.

ACC280   Palamat Practic ELT Water Bath

Sonolux Flash Evo

High-performance light curing unit with Xenon-stroboscope flashlights.

The Sonolux Flash Evo is a light polymerisation unit for the post-curing of generative built part models made out of Sonopal resins under protective gas (nitrogen). The protective gas atmosphere prevents the occurrence of an inhibition layer on the surface of the earmoulds and hearing aid shells. Thanks to the electronic timer which can be programmed individually, all production procedures as nitrogen supply polymerisation time and break times can be set exactly.

Dimensions	H 195 x W 517 x D 295 mm
Polymerisation chamber	H 40 x W 140 x D 180 mm
Weight	16.6 kg
Voltage	230 V / 50Hz

SON132   Sonolux Flash Evo

Polylux 100

The Polylux 100 is a basic light polymerisation unit for repairs and lacquering. The unit has a light source and mirrored interior surface which assure a safe polymerisation.

Suitable for repairs with Fotoplast® Gel and for surface refinement with Fotoplast® Lacquer 3.

Capacity	1 earmould
Dimensions	H 100 x W 95 x D 240 mm
Interior format of the polymerisation chamber	H 88 x W 90 x D 130 mm
Power consumption	30Watt
Weight	1.7 kg
Light source	2 x 9 Watt UVA light tubes
Light wave spectrum	315-400nm

SON104   Polylux 100
SON107   Turning Motor
SON107B Puretone Turning Motor

Polylux 500

Multi-purpose light-curing unit for acoustician shops. This comapct unit consists of a robust, powder-coated metal housing and a large practical lid.

The polymerisation chamber is completely mirrored so a turning motor is not necessary for curing of a lacquer coating. The polymerisation chamber provides space for four negative forms for earmoulds resp. for one earmould fixed with a tweezer. The timer enables to limit the maximum polymerisation time to 5 resp. 10 min. which is an additonal safety feature. The Polylux 500 can be used to polymerise the resins and lacquers of the Fotoplast® range.

Capacity	4 earmoulds
Dimensions	H 110 x W 215 x D 190 mm
Interior format of the polymerisation chamber	H 50 x W 150 x D 95 mm
Power consumption	35Watt
Weight	3.2 kg
Light source	2 x 9 Watt UVA light tubes
Light wave spectrum	315-400nm

Fotofix Faceplate Glue

Helpful for manufacturing and repairing of ITE systems. In clear transparent as well as colour matched to our most popular shell materials Fotoplast® S IO and Fotoplast® S ClC opaque H (yellowish), Fotofix prevents the gap-building between faceplate and shell.

Special Delivery

SON140   Fotofix Faceplate Glue - 20 ml

Glysol 1.0L

Polymerisation bath for curing Thermosoft lacquer, filling hollow spaces of the earmoulds for the shell forming.

SON139   Glysol 1.0L

Fotoplast® S IO

Light curing resin for the manufacturing of very thin break-resistant shells for ITE hearing systems (wall thickness 0.4-0.6 mm). Supplied in 500 g bottle.

SON134   Clear Transparent
SON134B   Medium Brown Opaque 3

Fotoplast® S Hard UVA

Transparent material for BTE earmoulds with hard and high-break resistant final consistency. Shell forming. Free of MMA and cadmium. Supplied in 500 g bottle.

SON135   Fotoplast® S Hard UVA

Thermosoft

Material with a soft final consistency for BTE moulds. Especially comfortable as the material becomers softer at body temperature in the ear. Low water absorbtion. Supplied in 250 g bottle.

Special Delivery

SON136   Thermosoft

Thermosoft Lacquer

Soft biocompatible lacquer for the coating of Thermosoft earmoulds or for an adhesive coating of Fotoplast® earmoulds. Glysol, Oxystop Fluid or protective gas is needed for curing without inhibition layer. Supplied in 20 ml bottle.

Special Delivery

SON137   Thermosoft Lacquer

Fotoplast® Lacquer 3

For lacquering resp. "glazing" of all hard earmoulds instead of mechanical polishing. Curing is done within 60 seconds (instant lacquer). Brilliant tissue friendly surface sealing. Biocompatible. Supplied in 20 ml bottle.

Special Delivery

SON138   Fotoplast® Lacquer 3
