Hear Ear[®] Hearing Aid Retention Device

A behind the ear hearing aid accessory, which reduces the risk of losing your hearing aids.

The device is crafted from a durable ABS plastic, is flexible and comfortable with no metal components ever coming into contact with the wearer. The Hear Ear[®] hearing aid securing clip is compatible with most behind the ear (BTE) hearing aids.

ACC463 Hearing Aid Retention Device

Dictionary Of Hearing

This dictionary includes a wide range of terms that are in general use in relation to the multi-disciplinary subject of hearing. It covers the fields of acoustics, audiology, electronics, medicine, phonetics, rehabilitation and social administration. The dictionary has been compiled to meet the needs of the professional who is non-specialist in some of the fields, of students taking courses related to hearing, of the lay person and of those whose first language is not English. The needs of the specialist are supported by the availability of concise definitions of terms in common usage.
